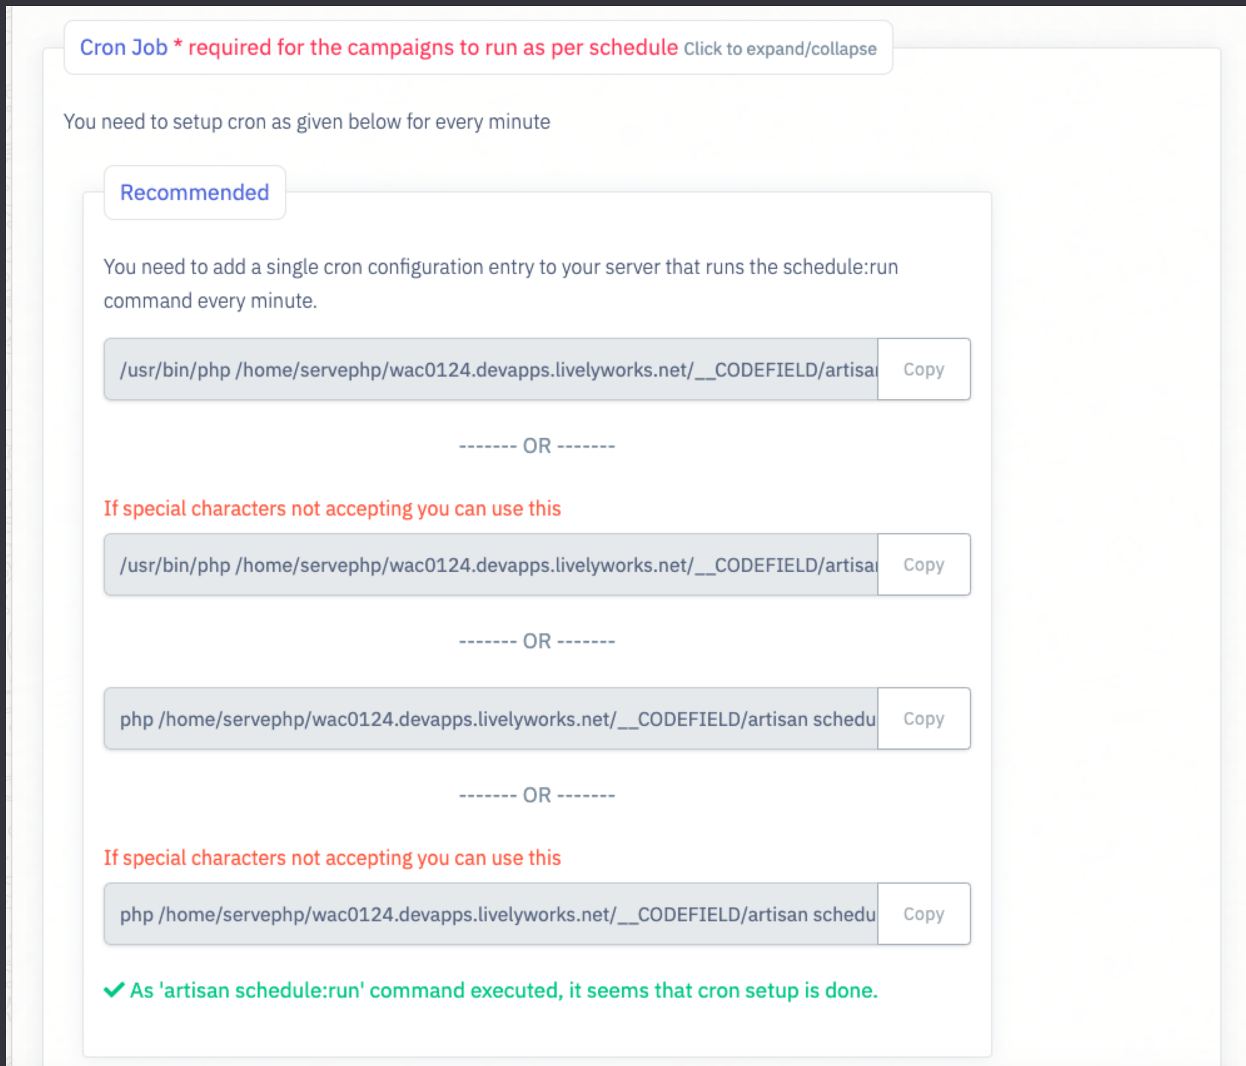
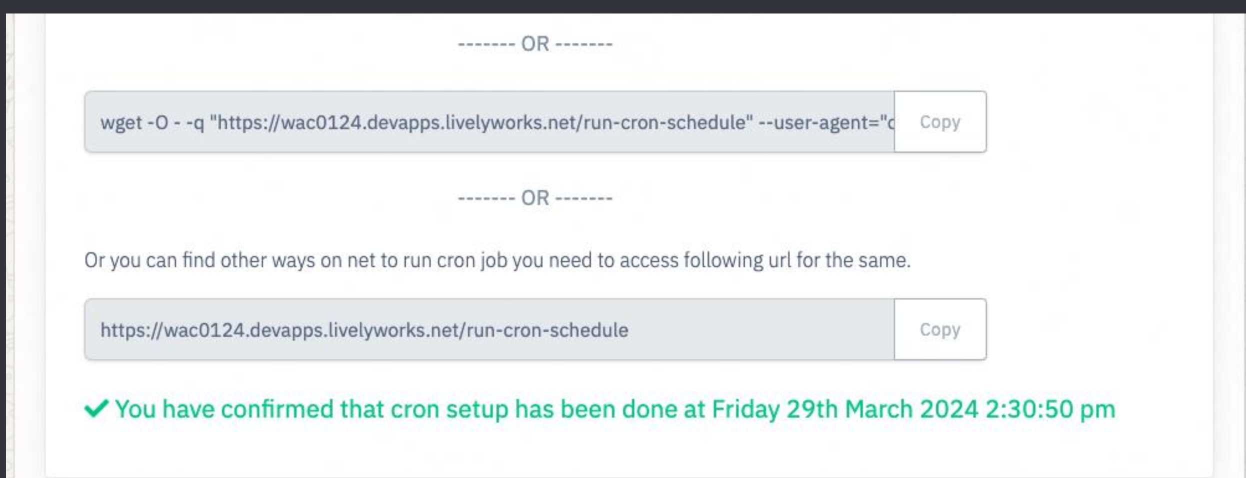
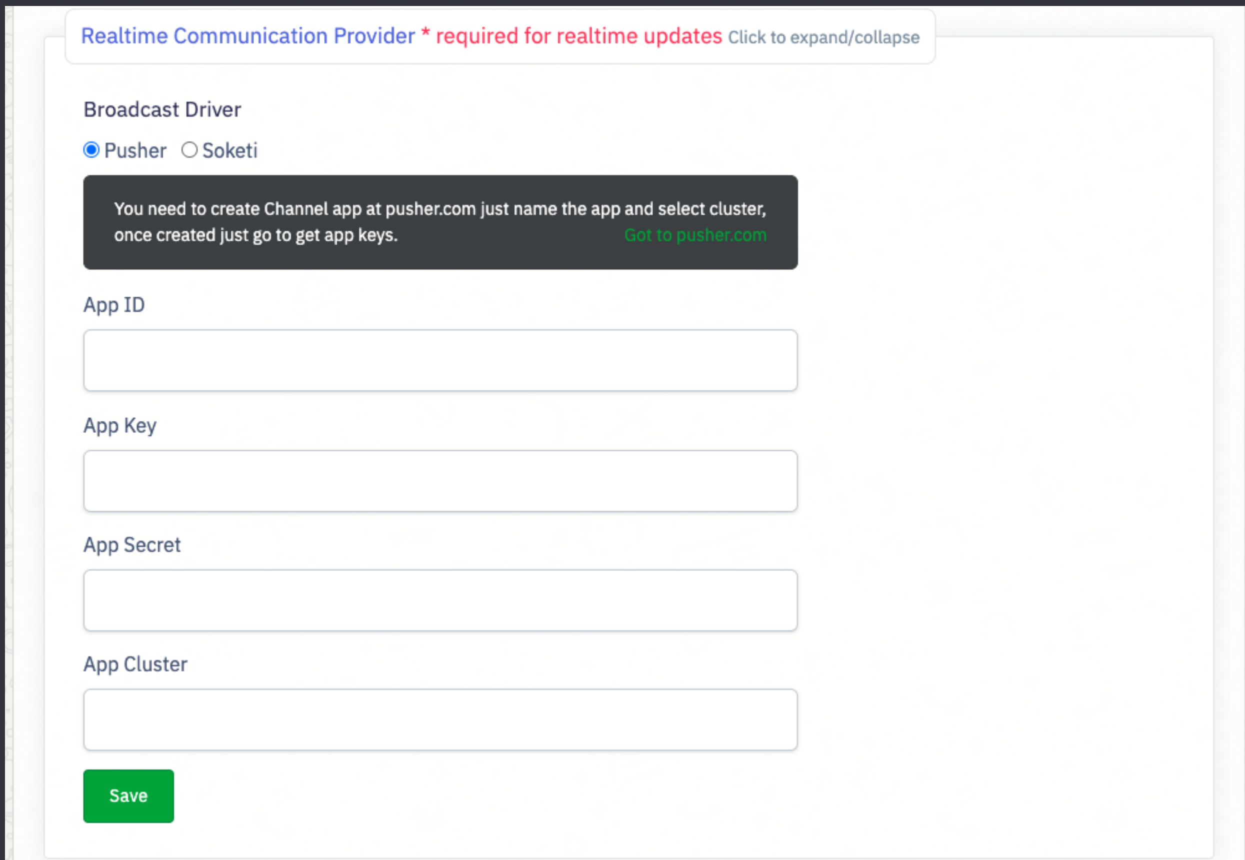
      To setup queue job you need to configure your queue driver as require in .env file. Database tables for the database driver already provided no need to migrate to create tables. Also, you need to run queue worker as suggested.
    - **Cron Job Setup** – if you enable Cron Job Setup you can setup the CRON as per instructions given which is required for campaigns to run as per schedule. You can also use services like https://cron-job.org/ for CRON jobs.
      Once you setup the CRON click on the Cron Setup: Mark as Done.



Cron Job * required for the campaigns to run as per schedule Click to expand/collapse
You need to setup cron as given below for every minute
Recommended
You need to add a single cron configuration entry to your server that runs the schedule:run command every minute.
/usr/bin/php /home/servephp/wac0124.devapps.livelyworks.net/__CODEFIELD/artisa
Copy
------- OR -------
If special characters not accepting you can use this
/usr/bin/php /home/servephp/wac0124.devapps.livelyworks.net/__CODEFIELD/artisa
Copy
------- OR -------
php /home/servephp/wac0124.devapps.livelyworks.net/__CODEFIELD/artisan schedu
Copy
------- OR -------
If special characters not accepting you can use this
php /home/servephp/wac0124.devapps.livelyworks.net/__CODEFIELD/artisan schedu
Copy
As 'artisan schedule:run' command executed, it seems that cron setup is done.



------- OR -------
wget -O - -q "https://wac0124.devapps.livelyworks.net/run-cron-schedule" --user-agent="c
Copy
------- OR -------
Or you can find other ways on net to run cron job you need to access following url for the same.
https://wac0124.devapps.livelyworks.net/run-cron-schedule
Copy
You have confirmed that cron setup has been done at Friday 29th March 2024 2:30:50 pm



Realtime Communication Provider * required for realtime updates Click to expand/collapse
